Fish's, for some distance the road runs around the foot of a hill, with a big precipice on one side and an embankment on the other. Just as they were passing a dead tree about two feet in diameter fell, striking the horse and knocking him, buggy and occupants down the embankment. Fortunately, Mr. Arnold and his companion escaped uninjured, but the horse is very seriously injured and it is doubtful whether or not he will recover. Because of the death of his betrothed, when a very young man, the Judge had remained true to his first love and lived a bachelor's life. But few men have been more successful in the accumulation of this world's goods than he, his wealth being estimated at several days' work with her name at the time of his death. **MUSICAL NOTES.**

The musical department is becoming quite a feature of the school and steady progress is being made in the direction of good music. The whole school is divided into two choruses, a Junior and a senior chorus. It is probable that there is not a single student in either chorus, who does not sing. The boys sing as well as the girls. They sing well, and some good musical voices and talents have been discovered among the pupils.

A male quartet and a girls' quartet have also been organized and are now in training. On the program of the next special, will be found choruses, duets, a school orchestra, will be organized very soon, work has already begun in this direction.

### RENT PAYS FOR THE LAND.

FERTILE SECTIONS OF THE SOUTHWEST, WHERE LAND SELLS FOR \$10.00 PER ACRE FOR \$5 PER ACRE.

One of the remarkable things about Eastern Arkansas and Northern Louisiana is the fact that cultivated lands rents for \$5 per acre cash and can be bought for \$7.50 to \$15 per acre. It costs \$5 to \$10 an acre to clear it. Other improvements are slight and inexpensive.

The soil is rich alluvial, or made. It produces a bale of cotton per acre, worth \$45 to \$60. This accounts for its high rental value. Other crops such as corn small grains, grasses, vegetables and fruits thrive as well.

Alfalfa yields 4 to 6 cuttings, a ton a cutting, and brings \$10 to \$16 per ton.

In other sections of these states, and in Texas as well, the rolling or hill-land is especially adapted to stock raising and fruit growing. Land is very cheap. \$5 to \$10 per acre. Proved farms \$10, \$15 to \$25 per acre.

The new White River country offers many opportunities for settlers. High, rolling, fine water—it is naturally adapted to stock and fruit raising. Can be bought as low as \$5 per acre.
